GREEN SHEET

Courses: DMT65

Instructor: Jim Blank

Room: E35 (distance learning)

E-mail: blankjames@fhda.edu

WEB Site www.cad-resources.com

Text and Reference: PTC Creo Parametric 3.0 textbook – Cengage Learning

Overview: 12-week Distance Learning and or on campus.

Catalyst: Distance learning and on-campus classes both use Catalyst to manage every aspect of the course. All materials and information can be accessed from any computer connected to the web including lectures.

Each individual lesson/project/exercise will be graded on a scale of 1-4 according to the accuracy, clarity and completeness of work. The final grade for this course is also based upon the submittal of a Student Documentation Package:

Basis for Grade: Your lessons and projects contain all required work and will be graded based on completion and correctness of each assignment. All grades and submittals will be controlled through Catalyst.

The student's score is calculated on the basis of your total raw score divided by the total number of possible points assigned.

Office Hours for Fall 2015 will be in E35 on Mondays and Wednesdays 4:30pm to 5:30pm.
