Text: Calculus & Its Application, by Bittinger, Ellenbogen, Surgent, 10th edition.

A graphing calculator is recommended (TI-83/84/86).

Overview: Introduction to limits, differentiation and integration of single variable functions; differentiation of multivariable functions: tangent, area, others; various business applications.

Pre-requisite: Math 11 or Math 41

Attendance: Since mathematics is cumulative in nature, attendance at all classes is expected. Students should be aware of appropriate drop dates. It is the student’s complete responsibility to drop this class as I will not drop anyone from the class. You are expected to attend all classes. Please inform me by email if you drop the class.

Homework: Homework assignments represent the student’s opportunity to learn what was taught, by practicing both mechanical skills and problem solving techniques. The student is expected to do- and is responsible for all problems associated with the sections of the text covered each class meeting.

Quizzes: Quizzes will be given in class. No makeup quizzes. Quiz problems are similar to homework problems and lecture examples.

Midterms: Two midterm exams will be given in class.

Final exam: Thursday March 26, 2020

Grading:	Quizzes	100
	Midterms (2)	200
	<u>Final Exam</u>	<u>200</u>
	Total	500
